Summary

Full-stack developer with a certificate from the University of Toronto full-stack development program. Specializing in the MERN stack with extensive knowledge of blockchain and web3 technologies. Excel at producing clean, readable, well-commented code while consistently striving to improve technical skills. Intensely curious about technology and eager to implement cutting-edge and legacy technologies.

Technical Skills

- JavaScript/TypeScript
- React/Angular
- HTML/CSS/SCSS/SASS
- Scalable Vector Graphics
- NodeJS
- MongoDB/MySQL
- Solidity
- Truffle/Ganache
- Remix/VSCode
- Git/GitHub

Projects

Stocker Inventory

- An inventory management system that integrates with a functional eCommerce site. This app utilizes the MERN stack with JWT authentication and authorization. Lead developer on this collaborative project. Primarily focused on the Apollo integration, database architecture, frontend queries/mutations and overall styling.
- GitHub Repo <https://github.com/SuedePritch/furry-leftover-broccoli>
- Deployed App <https://stockerinventory.herokuapp.com/category>

Golden Devs

- This project is for freelance developers and clients to connect. It utilizes a SQL database using the Sequelize ORM, express-sessions and bcrypt for user authentication, a NodeJS/Express server, and Handlebars for the templating engine.

ThreeJS was also used to create a 3D animated landing page. This was a collaborative project. I was responsible for building the API, landing page and logo design, UI/UX, authentication and the database tables referencing the tech icons.

- GitHub Repo <https://github.com/SuedePritch/fluffy-palm-tree>
- Deployed App <https://protected-peak-08029.herokuapp.com/>

Jedi Archives

- This project uses a third-party Star Wars API and provides the UI for research on the Star Wars universe. It utilizes JavaScript/jQuery, Tailwinds CSS, Star Wars API, and the Wikipedia API. This was a collaborative project in that I was responsible for integrating the APIs, the landing page design, and the UI/UX.
- GitHub Repo <https://github.com/SuedePritch/crispy-spork>
- Deployed App <https://suedepritch.github.io/crispy-spork/>

Experience

Shaw Cable Systems Ltd., Fort St John BC

System Technician

2019-2021

- Maintained Shaw's internet and cable infrastructure to ensure a positive client experience.
- Installed services to business and residential customers including cable, internet, phone, and security systems.
- Facilitated significant upgrades to local infrastructure that increased local systems from 750/860Mhz to 1.5 GHz allowing Orthogonal Frequency Division Multiplexing.

Spectrum Resource Group Inc & Windfirm & Zanzibar & Reclaimit

Foreman, OFA Level 3, Silviculture Worker, Timber Cruiser, Faller, Brusher

2009-2018

- Navigated quality standards set by the Ministry of Forests, Lands, Natural Resources.
- Trained workers in the field while providing information on ever-changing safety guidelines and precautions, such as wildlife or dangerous trees.
- Acted as primary Occupational First Aid Level 3 attendant establishing care for remote worksites with large workforces.
- Managed scheduled projects ensuring strict compliance with all applicable deadlines and budgets.

Education

University of Toronto Full Stack Developer Certificate

MongoDB University

Dapp University

Blockgeeks

Society of Cable Engineers: Maintenance Technology Level 2, Network Testing and Maintenance Level 1

Fanshawe College – Machinist Apprenticeship
